Use, Revision and Dissemination of UGME Competency Framework & Medical Council of Canada Clinical Presentations Procedure

Curricular Component: Procedure #CC-11P v3

Corresponding Policy: #CC-11

Supersedes: none

Lead Writers: C. Miller, S. Pinchin

Approved by Curriculum Committee: July 21, 2016

Revisions: November 2013 (original)

February 26, 2015 (v2)

July 21, 2016 (v3)

Procedure for reviewing the Queen's UGME Competency Framework

In accordance with article 3.1, the Curriculum Committee will review the content of Queen's UGME Competency Framework at least every two years. At the time of the review, objectives might be added, removed, modified, assigned to different roles, etc.

Three months prior to the review, the Year Directors, Course Directors, Competency Leads, UGME teaching faculty, and Aesculapian Student representatives will be notified. They will be asked to provide input regarding the Competency Framework by sending suggestions to the Chair of the Curriculum Committee for compilation into a report.

The Chair of the Curriculum Committee will commission a working group consisting of a small number of Curriculum Committee members representing diverse areas of the curriculum to work on reviewing the suggestions. The working group will include at least one student. All feedback gathered from Year Directors, Course Directors, Competency Leads, UGME teaching faculty and students will be provided to the working group six weeks prior to the date of the review. The working group will write a summary report recommending changes to the UGME Competency Framework, then liaise with the Competency Leads and any discipline leads, as necessary, before making recommendations to the Curriculum Committee. The working group's report, which will include potential deletions as well as inclusions and additions, will be circulated to the Curriculum Committee two weeks prior to the review date, with the request that feedback be provided to the working group within one week of the report being circulated.

On the review date, the Curriculum Committee will review and vote on proposed changes to the content of the Queen's UGME Competency Framework. If there are items that require further review, they will be addressed by the working group, then placed on the agenda for the next Curriculum Committee meeting. The Curriculum Committee may choose to implement changes as soon as they are approved. Otherwise, the changes will take effect for the next full iterations of affected courses.

Procedure for the Implementation of the Queen's UGME Competency Framework

In accordance with articles 3.2 and 3.3, the Curriculum Committee will assign curricular objectives as well as Medical Council of Canada Clinical Presentations to all courses. Minutes of meetings where curricular objectives and Medical Council of Canada Clinical Presentations are assigned will be sent to all involved parties, including Year Directors, Course Directors, and Competency Leads.

The Curriculum Committee will seek feedback from Year Directors, Course Directors (representing faculty), and Competency Leads annually regarding the appropriate placement of the objectives and clinical presentations. This will be accomplished by:

1. The CFRC Review Process: Each Course Director and Competency Lead will have the opportunity to query the assignment of specific curricular objectives/MCC presentations and to make alternative suggestions. The Chair of the Course and Faculty Review Committee will forward suggestions to the Chair of the Curriculum Committee as soon as they are received.
2. Presentation to the Curriculum Committee: Course Directors, Competency Leads or Year Directors may bring specific proposals about changes to the assignment of curricular objectives/MCC presentations to the Curriculum Committee by prior arrangement with the Chair. (Course Directors and Competency Leads may make joint presentations.)
3. The Competency Leads may make recommendations regarding competencies to the Curriculum Committee.
4. The Curriculum Review ("gaps and redundancies") process: Through this process, the UGME Educational Development and Faculty Support Team will keep a record of all course content recommendations from the Teaching, Learning and Innovation Committee and/or the Curriculum Committee and will provide the information to the Year Directors on an ongoing basis. The Year Directors will consider the recommendations and how they might be implemented. Should this process necessitate a change to the assigned curricular objectives or MCC presentations for a course or clerkship rotation, the relevant Year Director will make a presentation to the Curriculum Committee.

Procedure for Communicating Changes to the Queen's UGME Competency Framework & Medical Council of Canada Clinical Presentations

In accordance with article 4.2 of Policy #CC-11, the following steps will be taken if any of the following changes are made:

- Changes to the Competency Framework and/or the assignment of curricular objectives and MCC Clinical Presentations to courses
 - Changes to course names, course codes, or other items that have bearing on a course or the curriculum
1. The staff person responsible for supporting the Curriculum Committee will notify the following people/groups about the changes:
 - a. Year Director, copying the relevant Curricular Coordinator
 - i. The Year Director will then notify the relevant Course Director(s)
 - b. Senior Business Analyst, Education Technology (MEdTech Central)
 - i. The Senior Business Analyst will be provided with a listing of any changes that need to be made to the assignment of curricular objectives and MCC Clinical Presentations to courses in MEdTech and their activation and/or deactivation date
 - ii. The Senior Business Analyst will be provided with an updated PDF version of the UGME Competency Framework so that the link under the Curriculum Tab, and any other links, can be updated
 - c. Web Developer
 - i. The Web Developer will ensure that any illustrations representing the curriculum are updated
 - d. Manager, Undergraduate Medical Education
 - i. The Manager, Undergraduate Medical Education, will liaise with the Office of the University Registrar to ensure changes to course names, weighting, and/or course codes are reflected in PeopleSoft
 2. The staff person supporting the Curriculum Committee will notify all Course Directors, Year Directors, Program Directors, Competency Leads, teaching faculty, and students of changes via a posting to the UGME blog.

Procedure to Update the MEdTech Central MCC Clinical Presentations List

1. The Special Assistant for Curricular Review (or a designate) will review any changes made to the MCC list twice a year, at the end of Terms 1 and 3 (December) and at the end of Terms 2 and 4 (June).
2. The new MCC list will be compared with the MCC list in MEdTech Central and any changes will be noted.
3. These changes will be presented to the Curriculum Committee, which may decide to assign new presentations to some courses and delete presentations from other courses.

All relevant Course Directors and Curricular Coordinators will be notified of any changes to the MCC presentations assigned to their courses by the staff person responsible for supporting the Curriculum Committee.
