

UpToDate Notice of Termination  
Postgraduate Medical Education Office  
October 2, 2019

The Postgraduate Medical Education Office at Queen's University will no longer be providing Site License access to UpToDate for all residents, effective June 30, 2020.

The decision to end the Site License at the end of this academic year has been made after carefully reviewing all of the options for point-of-care tools at Queen's, reviewing what is available or provided at all Canadian medical schools, and factoring in the ever increasing costs of UpToDate.

Queen's University provides those with a Queen's affiliation with excellent and evidence-based point-of-care tools at no cost to trainees or the University through Bracken Library. These tools can be accessed remotely and some have mobile apps.

For more information on what's available to Queen's residents, fellows and faculty visit:
