

Connecting to KHSC Corporate Wi-Fi

Apple Mac (OS X, OS) Instructions

August 2018 v1.0

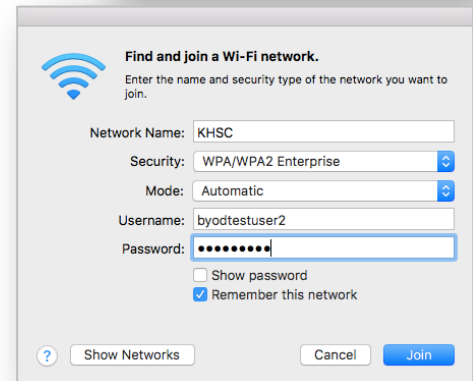

1. Click the 'Wi-Fi' option and select 'Join Other Network...'

2. Enter the below details, then select 'Join':

Network Name: **KHSC**
Security: **WPA/WPA2 Enterprise**
Username: Your KHSC credentials:
 "HC\USERNAME"
Password: Your KHSC password

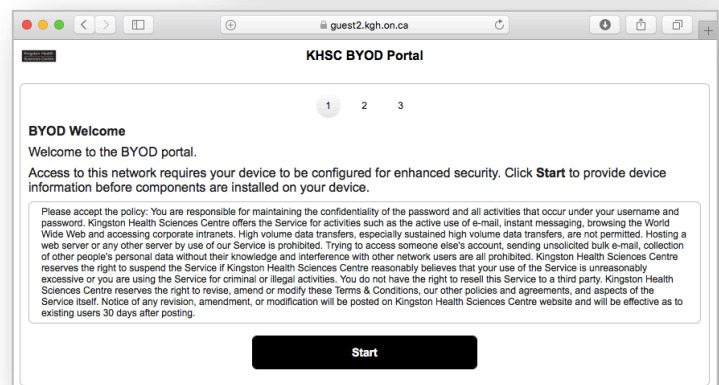

Note: If you get an error message from the captive portal stating your browser isn't supported, close the captive portal, start Safari and enter a website to access.

3. Click 'Continue' to verify the certificate and enter your Mac credentials to update the settings

4. Once connected, open Safari and enter a website in the address bar (e.g. www.kgh.on.ca), you will be redirected to the "KHSC BYOD Portal"

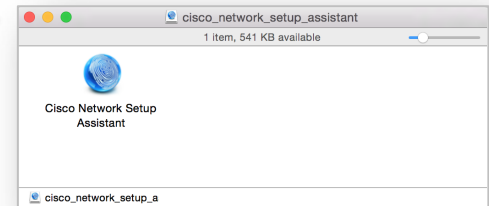

5. Read the Acceptable Use Policy, then click 'Start'

6. Enter a 'Device name' and optionally a 'Description', then click 'Continue'

7. Open the downloaded file “SPW.tar” to extract the file “cisco_network_setup_assistant.dmg”

8. Open the “cisco_network_setup_assistant.dmg” file, and launch the “Cisco Network Setup Assistant”; click ‘Open’ when prompted

9. Click ‘Start’ to begin downloading the profile

10. Click ‘Continue’ to verify the certificate and enter your Mac credentials

11. Click ‘Exit’ and your device is ready to use the internet
